

How often do you feel LIMITED or WATCHED when BROWSING the internet?

DiaBrowse

Over the last months several countries worldwide have passed laws forcing telecom providers to **store** and make available **browsing history** to supervisory bodies.

Also certain countries **block** specific content on the internet.

DiaBrowse offers you:

Complete privacy

- No browsing history stored externally.
- Internet traffic redirected over different geographical locations.
- You and YOU ALONE decide which websites you want to visit, without limitations.

Full control of your internet connection

- Improved and easy setting of browsing rules.
- Improve staff performance by (partially) limiting internet usage to company-related sites.
- Built-in statistics on internet usage.

Platform independent functionality

- No local software installation required.
- Connection settings applied to single user PC or entire network.
- "Future proof" – System retains functionality, regardless of new technology.

DiaBrowse compared to general anonymizers

- Higher overall browsing speed.
- Fully customizable connection upon demand.
- Easy reachable support available.
