

# DiaMotus

All companies that trade in valuable goods, especially **diamond companies**, invest in a **video surveillance system** to protect them against criminals. This video surveillance system **stores** recorded images locally in the office. But...

## How SECURE is your video SURVEILLANCE in case of EMERGENCY?

### DiaMotus offers you:

#### Complete safety

- Images stored on DiaMOTUS are uploaded instantly.
- Even if your DiaMOTUS system is destroyed or stolen, you have the evidence online!
- Data transfers between local and remote system are SSL encrypted.

#### Compatibility

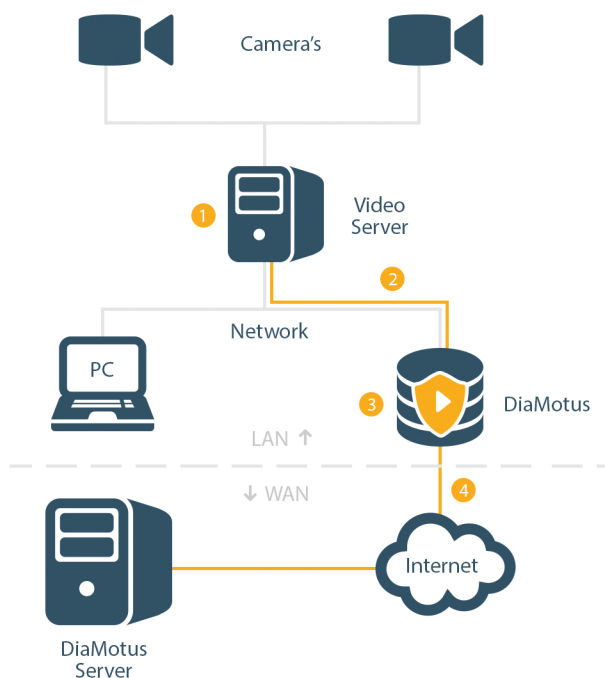

- DiaMOTUS is compatible with your existing video surveillance system.
- DiaMOTUS acts as a storage device where your video surveillance system can store images or video when motion is detected.
- DiaMOTUS is an extension to your current system.

#### Flexibility

- The DiaMOTUS system can be fully customized: capacity and form factor can be adapted to your needs.
- Store images or video local for a specified time.
- Enjoy unlimited online DiaMOTUS storage!

#### Global presence in the diamond industry

- Present in the market since 1988.
- Core-systems in every major diamond center.
- In-depth knowledge of market needs.

- 1 Motion detection happens.
- 2 Your existing video surveillance system stores images or video files on the DiaMotus system.
- 3 DiaMotus instantly detects new files.
- 4 DiaMotus immediately transfers these files to the DiaMotus Server using a secure SSL connection.
