

# DiaPhone

Over the last months **several countries world-wide** have passed laws forcing telecom providers to store and make available **communication logs** to supervisory bodies.

**How SECURE do you feel sharing CONFIDENTIAL company information over the PHONE?**

## DiaPhone offers you:

### Complete privacy

- No call logging or tracing possible.
- Limited ONLY to the diamond industry.
- Double encryption – unhackable.

### FREE internal communication

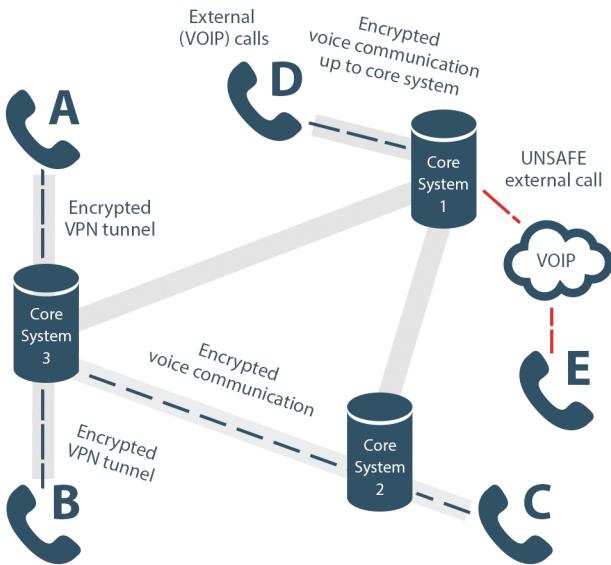

- Communication between your group of companies in different geographical locations.
- Communication with other diamond companies using the DiaPhone system.
- Communication with subscribed verified diamond industry service providers.

### Global presence in the diamond industry

- Present in the market since 1988.
- Core-systems in every major diamond center.
- In-depth knowledge of market needs.

### External call possibility

- Use of VoIP providers – Charges may apply.
- Diminished security and privacy levels.
- Distinguishable ringtones clearly differentiating private and external calls.

#### Phone call A to B

- Local secured call between DiaPhone users
- Fastest possible communication
- Encrypted communication within encrypted tunnel
- Use of 1 core system only

#### Phone call A to C

- International secured call between DiaPhone users
- Fast communication
- Encrypted communication within encrypted tunnel
- Use of 2 core systems

#### Phone call D to E

- Partially secured local or international call
- Communication speed depending on VOIP provider
- Encrypted communication within encrypted tunnel up to Core system
- Use of 1 core system and external voip provider

← **This is how it works**
